DETAILED ACTION

Status of the Application

Claims 1-23 are pending in this action. Claims 1-23 are subject to an Election/Restriction requirement.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 20 & 23, drawn to a dietary supplement and a method for improving the taste and odor of noni-based dietary supplements, classified in class 424, subclass 439.
- II. Claims 13-19, 21 & 22, drawn to a dietary supplement comprising a noni puree concentrate, classified in class 424, subclass 439.

Note: For restriction purposes, it is assumed that claims 21 & 22 refer to the 'dietary supplement' of Group II claims rather than the 'method' of claim 20 as currently recited. Claims 21 & 22 have been included with Group II dietary supplement claims.

The inventions are distinct, each from the other because of the following reasons:

The claims of Group I (1-12, 20 & 23) are drawn to a dietary supplement, which can be in the form of either a solid or liquid. The claims of Group II (13-19, 21 & 22) are drawn to a dietary supplement comprising a noni puree concentrate, which is essentially an extract. The claims of Group I do not require formation of an extract, whereas the claims of Group II require formation of a puree concentrate or extract. Therefore, the different Groups I and II have different issues regarding patentability. Art anticipating Group I would not necessarily anticipate or even render obvious Group II. The different compositions require completely different searches in both the patent and non-patent databases, and there is no expectation that the searches would be coextensive. This creates an undue search burden upon the Examiner.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR

Art Unit: 1615

1.143). Because the above restriction/election is complex, a telephone call to applicants to request an oral election was not made. See MPEP 812.01

Applicant is also reminded that a 1-month (not less than 30 days) shortened statutory period will be set for response when a written restriction is made without an action on the merits. This period may be extended under the provisions of 37 CFR 1.136(a).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
